P.O. Box 1012 • Elko, Nevada 89803

## **As of the 2022-2023 school year, a student enrolling in 12th grade in Nevada schools must receive the MenACWY (also called MCV4) Vaccine**

As of the 2022-2023 school year, a student enrolling in 12th grade in Nevada schools must:

- Receive an immunization against *Neisseria meningitidis* (meningitis) in the form of a quadrivalent meningococcal conjugate vaccine (MenACWY).
- Receive at least one dose of MenACWY on or after 16 years of age.
- Note that this new requirement does not apply to students enrolled in a Nevada public, private, or charter school before July 1, 2009.

**FAQs and Local providers (page 2) are provided below.**

FAQs:

- **Does this requirement apply to all students prior to starting the 12th grade year? Or just to students who are new to the district, and "enrolling in 12th grade"?**
  - This requirement applies to all students who will be in 12th grade after June 30, 2022. This includes all current 11th graders who will move on to 12th grade after June 30, 2022. This also includes new students to the district who will be in the 12th grade after June 30, 2022.
    - This may even apply to 10<sup>th</sup> graders if they skip a grade and will be in 12th grade after June 30th, 2022.
  -
- The State's MenACWY resources and Technical Bulletins can be found here:
  - [School and Child Care Immunizations \(nv.gov\)](#)
  - [Technical Bulletin for MenACWY 12th grade requirement \(nv.gov\)](#)
  - [July 15, 2021 TB-IZ Exemption Requirement K12 \(nv.gov\)](#)
- **The requirement states "....A student enrolling in 12th grade...." \*\*\*Students currently in 11th grade are not enrolling in school (12 grade), they are already enrolled and just moving into the next grade. Does this apply to these students**

- This requirement applies to all incoming 12th grade students, even if they've been in the Nevada school system before. **Everyone who will be a 12th grader after June 30, 2022 will need at least one dose of MenACWY.** This means 12th grade students new to the system *and* current 11th graders who will move onto 12th grade for the 2022-2023 school year.
- For school requirements, "enrollment" doesn't mean "newly enrolled." It refers to how many students will be and/or currently in that grade. The Nevada Department of Education is required to post a report that includes enrollment for each school year as of "count day," which is sometimes also called validation day. Districts and charter schools submit their enrollment numbers for all of their schools, by grade and demographics, to the Department and can be found here: <https://doe.nv.gov/DataCenter/Enrollment/>
- The requirement states that this rule does not apply to students enrolled before 7/1/2009. Does this apply to my student?
- There is no grandfathering for this requirement. Most of the incoming 12th graders will have been born in 2005, so the 2009 clause doesn't affect them (with the exception of special circumstances).
- My student received this vaccine in 7th grade. Do they need another dose?
- Many teens should have received their first MenACWY dose in 7th grade, so this acts more as a booster dose.
- CDC states that: "All 11 to 12 year olds should get a MenACWY vaccine, with a booster dose at 16 years old." The goal is to vaccinate as many teens as possible ahead of 6/30/2022 to fully protect against meningococcal disease.

### Immunization Providers in Elko County

Facility	Phone #	Address	Accepts Medicaid	VFC provider	Appointment
CVS	738-7177	550 W Idaho	Yes	No	Schedule Online <b>Age: 6yrs +</b>
